The Smallest Details Make the Biggest Difference

Pacific Register is a team of focused artisans dedicated to bringing timeless elegance inside your living and working areas. We provide decorative registers and architectural elements to elevate the visual appeal of your space. We're committed to providing customers with finely crafted work and unmatched service to help put the final touches on any project.

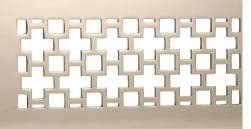

In 2001 we recognized a need for quality decorative vent covers. With decades of HVAC industry knowledge we set out to manufacture vent covers in any size and pattern and create an offering that was not available anywhere else. Since then we have equipped ourselves with state-of-the-art manufacturing technology to create custom decorative vent covers, grilles and decorative accents to match the distinct architectural style of any home. We manufacture products to meet the needs of architects, designers and contractors in all segments of the construction industry. Our manufacturing process allows us to rapidly design, customize and configure products desired by our clients in a limited timeframe. With experience creating decorative pieces from metal, wood, plaster, and glass fiber reinforced concrete (GFRC) we are confident we can deliver the custom piece that will elevate your space.

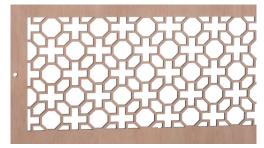

Trust Pacific Register to deliver the specific addition that will compliment your unique style and design.

LIGHTWEIGHT & DURABLE ALUMINUM

It's time to explore the intricate details of Pacific Register's cast aluminum registers and discover how the smallest details can enhance the overall elegance and luxury of your home. Cast aluminum registers are cast in the USA and designed to be long-lasting without warping or cracking. Available in multiple sizes and 3 patterns, our cast aluminum products will match your décor while adding charm to the smallest details of your home. Registers have a frame thickness of 3/16" and a pattern area that is 3/8" to 5/8" thick depending on size.

The lightweight and durable material make these perfect for use in the floor, wall or ceiling.

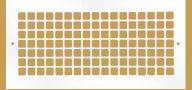

CAST ALUMINUM VS CAST IRON

There are a variety of reasons to choose cast aluminum over iron. Aluminum includes significant weight savings over cast iron. Aluminum also does not corrode or rust in the way that iron does. Once powder coated or painted, the two materials are indistinguishable from each other. Cast aluminum matches the durability of cast iron and we provide a lifetime warranty for all of our cast aluminum grilles.

MADE TO ORDER GRILLES

Don't ruin a spectacular space with ordinary final touches. Our extensive catalog of fully customizable decorative registers and grilles are made out of aluminum, steel, brass, wood, plaster, stone or concrete to match the unique space you wish to adorn. Matching vent covers to your specific style has never been easier.

With over 50 design patterns, various material types, and numerous finish and color options, the design possibilities are endless. State-of-the-art precision machines allow us to create any pattern you can dream up. Our custom approach ensures you will find the perfect pattern and color combination.

- > METAL > BRASS
- > WOOD
- > PLASTER
- > CONCRETE

Metal Grilles

Sophisticated elegance and sustained durability make metal an excellent choice for architects and homeowners alike. The aesthetically appealing and sturdy grilles elevate the elegance of any space and will last the test of time. Custom cut aluminum grilles are lightweight and very durable, and are used for wall and ceiling applications. Our steel grilles are designed to bear weight and are used for our floor registers.

Custom made to order wood products are available in any wood species, in both paint and stain grades. We also accept customer-supplied wood.

Accessories

Directional Louvers

Our directional louvers provide ultimate airflow control. Each blade is individually adjustable so airflow can be custom tailored to the needs of any space. Upon order, blades can be specified to run long way or short way. Louvers are painted black for concealment and fit snug into the duct opening behind the grille.

Opposed Blade Dampers

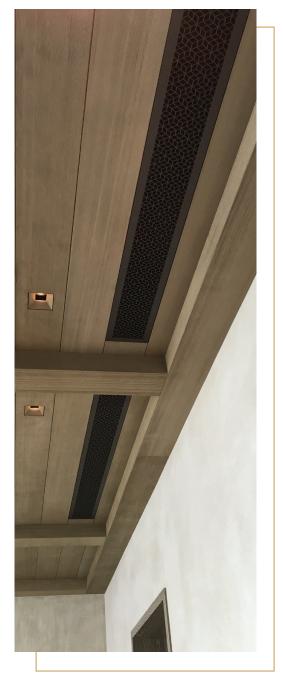

Fitting securely into the duct opening, dampers control the amount of airflow entering a space. They allow for airflow to be adjusted, without changing direction. Blades can be manipulated to be open or closed with a simple screwdriver.

Flush Mount Frames

Flush mount frames allow our metal or wood registers or ceiling. They enhance your home or office decor with a touch of sophistication and elegance. Our frames are designed to be installed during the framing stage of your home construction.

Flush Mount Frame

Standard Frame

Linear Bar Grilles & Linear Slot Diffusers

Linear Bar Grilles

These custom welded registers can be made to fit any duct size. Standard frames allow for the register to be installed flush to the face of a finished wall surface. Pre-drywall frames allow for a seamless look and are recommended for modern and minimalist-style homes.

- Can be custom fabricated with various bar dimensions and spacing. Suggested bar sizes are 1/8" x 1/2" or 1/4" x 1/2"
- > Grilles can be easily detached from the frame using the supplied clips
- > Available in aluminum and brass
- > Can be painted to match any wall color

Linear Slot Diffuser

Our linear slot diffuser is an alternative to vent covers for long duct openings. Made from welded aluminum, the diffuser installs flush to the surface of the wall or ceiling for a modern, minimalist look. This product is intended to be used for new home construction and pre-drywall installation as opposed to retrofit applications. Great behind drywall, stone, wood planks, cement board, GFRC and other panels.

- >Available in 1", 1.5" and 2" widths
- >Welded Aluminum

Plaster & Concrete Grilles

Our plaster or concrete grilles are a popular option for a flush, borderless installation. Plaster and concrete grilles require a professional installation during the construction phase of the application wall. These grilles produce a timeless and traditional facade. Grilles can be provided in any size, pattern and thickness to match the detail and sophisticated requirements of any project. We provide fiber-reinforced options as well when additional strength is required.

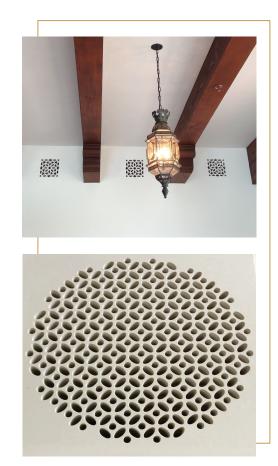

Applications

> Interior Wall (Plaster)> Exterior Wall (Concrete)

Custom Work

> Decorative Stair Risers

Stair risers create the perfect unique design for your staircase. Stair risers are custom designed and can be created in any length and pattern to meet the specifications of your staircase. Custom stair risers are also available unfinished, or in different finishes including black, oil rubbed bronze, or white.

> Plaster & Concrete Accents

Plaster and concrete accents are decorative elements custom designed to fit seamlessly into your wall which provides a unique accent piece to the interior of any home. These beautiful elements give the appearance of a smooth design detail cut into a thick plaster wall. These accents require a professional installation and can be custom made in any size and design pattern.

> Customer Supplied Stone

We can precision cut any design into most customer-supplied stone or tile to make HVAC grilles or drain grates that perfectly blend in with stone surroundings. Give our helpful customer service department a call to talk about your project and see if we're able to use the unique materials required for your next project.

DECORATIVE PANELS & SCREENS

Accent the Architecture of Your Space

Decorative panels can be custom made to any size and pattern, based on the unique requirements of your project. We custom fabricate panels from aluminum, steel and wood and can provide finishes in a variety of custom colors. Panels can be made for indoor or outdoor use, and common applications include privacy screens, ceiling panels and decorative metal railings. Contact us with your own custom requirements and we can create the perfect panel for your needs.

Decorative Panels & Screens

>Laser Cut Metal Panels

Our decorative panels can be manufactured for indoor or outdoor applications. For outdoor panels, many customers opt for weathered steel, which will appear to rust over time but doesn't lose integrity. Our powder coated aluminum panels function well as indoor or outdoor panels and privacy screens, and can be finished in any color.

> Custom Metal Ceiling Panels

Transform a standard ceiling into a piece of art with a custom ceiling panel. Our aluminum panels can be created in any size and finish option to adorn your ceiling.

>Laser Cut Wood Panels

Wood panels offer a custom feel while bringing warmth into any area. These full-size custom wood ceiling panels are a good fit for upscale restaurants, hotel lobbies and luxury homes.

>Aluminum Overlays

Laser cut aluminum panels can be used in a variety of ways. Panels can be overlaid on a mirror creating the feel of a larger space while adding a decorative element. Overlays function well in areas such as loft-style apartments, office lobbies, restaurants and retail stores.

> Decorative Metal Railings

Create a custom style for your balcony or porch with laser-cut metal railing. Railings provide the needed protection while allowing a unique style to adorn your balcony.
